

HazKrush

HAZKRUSH

Designed to densify large quantities of cans containing aerosol residues. The briquette output can be sold as premium scrap metal. Recovered liquids and gases can be blended to create a useful industrial fuel.

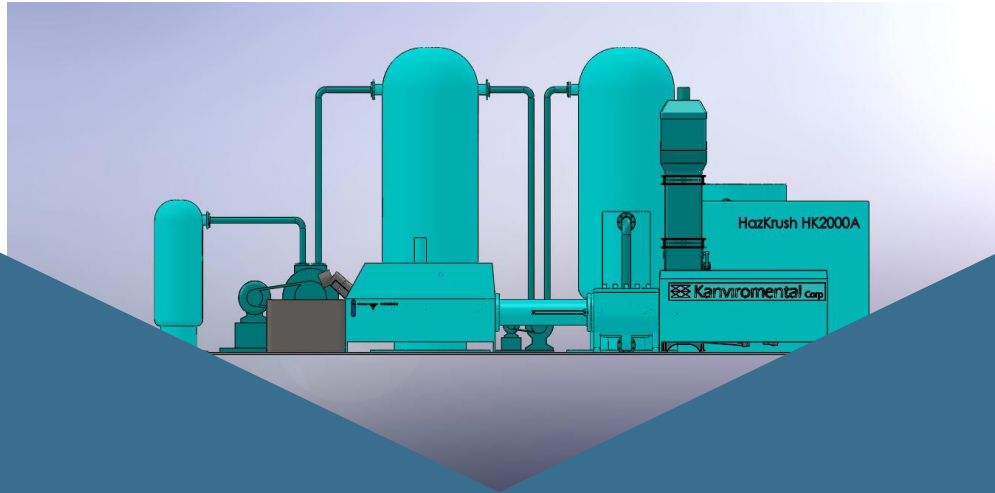

ADVANTAGES

- Transforms your hazardous waste disposal cost into a revenue stream.
- Large processing capacity
- Maximum recovery of contents for recycling
- Scalable to meet your needs

Model# HK1000, 2000, 6000
